NEW OPEN IMPELLER END SUCTION CENTRIFUGAL AVAILABLE FROM EBARA INTERNATIONAL CORPORATION STANDARD PUMP DIVISION

ROCK HILL, SC – MARCH 31, 2005 – EBARA International Corporation (EIC) Standard Pump Division announces the newly available Model DWO open impeller, stainless steel centrifugal pump. The Model DWO is designed for reliable pumping of dirty water with suspended solids up to 3/4" in diameter, making it ideal for such applications as food processes, bottle or parts washing and water treatment/reclamation.

The model DWO handles capacities up to 250 GPM and heads to 65 feet with a horsepower range from 1½ HP up to 4 HP. The DWO is available in (discharge) sizes up to 2½ inches.

The model DWO open impeller end suction pumps are constructed of bulge formed stainless steel and designed for corrosion resistance, dependable performance, and rugged continuous duty. The close coupled design saves space and simplifies maintenance and installation. The high quality stainless steel liquid end components are corrosion resistance and have NPT threaded connections or hose barb connections

- more -

The top centerline discharge and foot support under casing ensures self-venting and reduces misalignment from pipe loads. The model DWO is available with TEFC motors manufactured by EBARA Corporation.

EBARA International Corporation (EIC) Standard Pump Division, located in Rock Hill, SC is the U.S. sales and service subsidiary of EBARA Corporation, Japan. With 53 subsidiaries in 17 countries and annual sales exceeding \$5B, EBARA Corporation is one of the world's largest, leading pump manufacturers. The EIC Standard Pump Division offers a full product line of submersible water, wastewater in both cast iron and stainless steel pumps. The Standard Pump Division maintains inventory that allows it to assemble, test, and ship pump units and offer a 24-hour quick-ship program for stainless steel stock pumps and parts and 3 to 5 days on cast up to 60 HP.
